skills

JavaScript

React

Redux

SASS/CSS

HTML

Git

Photoshop

Figma

About me:

So, my name is Gamza and I'm 18 years old.

For past 2 years I have been practising in front-end development. At first, I learned basis - css html. Then I started to learn javascript, because I always wanted to build web apps.

About 1 year ago I started to use my skills on freelance. It helped me to practice and I learnt how to write clean code. Also I'm good with OOP and SOLID.

Now I want to extend my knowledge as specialist and commercial web development - the best sphere for it.

Work experience:

Web development experience:

- Built more than 5 react-redux projects.
- Developed front-end for more than 10 large sites using JS, React, HTML and Sass.
- Developed 1 site using php and mysql.

Communication experience:

- Developed and built projects by myself for about 15 clients on freelance
